Contact: contact@phiar.net

Who We Are

We are developing the world's first AI-powered AR navigation platform for drivers, using our ultra-efficient deep learning road-understanding AI. We are a group of dedicated professionals formed out of Harvard and the Harvard Innovation Labs in 2017, bringing expertise in deep learning, computer vision, software optimization, and UX design. We are backed by multiple tier-1 mega VCs and Y Combinator (TechCrunch feature: https://tcrn.ch/2TQHATu). Now is the perfect time to join our core team and revolutionize how billions of people perceive and navigate the world!

Who You Are

We are looking for someone to lead the product development of our consumer AR navigation mobile app. You will work with star engineers and product designers in a fast-paced, rapidly growing, challenging environment to achieve the company's vision for redefining navigation.

Responsibilities

- Own the Phiar consumer mobile app. Lead the development, launch, and subsequent releases on a regular basis

- Develop and drive execution of a user-focused product roadmap via close collaboration with senior leadership, design and engineering

- Conduct experiments from small scale user research to large scale A/B testing to make data-driven decisions

- Lead and manage the product testing plan and the Beta program, as well as the mobile user acquisition funnel

- Communicate in a timely fashion clear roadmaps, priorities, experiments and decisions

- Be a thought leader around building high-impact, best-in-class, user-focused products

Qualifications

- Experience with successful launches of mobile consumer products backed by AI and/or computer vision technology

- Understanding of navigation pain points

- Superior design instincts with a keen eye for detail

- Bias towards action, can-do mentality

- Excellent influencing skills and flexibility in a dynamic startup environment

Bonus

- Prior experience in navigation or mapping related products

- An academic background in Computer Science or relevant engineering discipline

- Technical understanding of AI/AR technologies

Join Us!

Phiar is a leading AI and AR company with industry leading on-device mobile deep learning AI technologies. We offer competitive salaries, company stock options, company sponsored medical/dental/vision/chiro/life benefits, commuter benefits, unlimited PTO, and we sponsor H1-B visas. We are a group of passionate and fun loving people. Join us to build something amazing and let's change the world together!
